

SIZE CHART SAGUARO CHILDREN

Please check the your child's feet length as indicated below. Then simply check from the table (further down) the right size of the shoe.

How to measure your feet?

Step 1

Position a piece of paper on a hard floor next to the wall, and step on it making sure your heel is slightly touching a wall behind.

Step 2

Mark the end of your big toe and the outermost part of your heel on the paper, and repeat the process with your other foot.

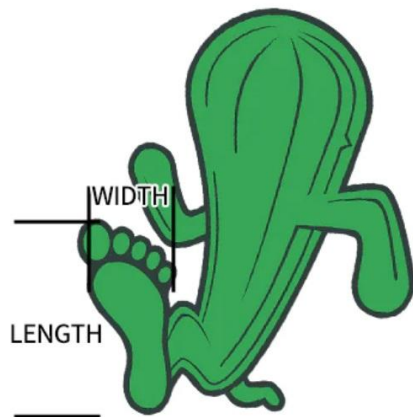

Step 3

Measure the distance between the two markings for booth feet. If your feet have two different sizes, when comparing against the size chart use the length of your larger foot.

(PETRI'S TIP - if you are between two sizes take the bigger shoe and you are fine! NOTE! In the chart the length is the length of YOUR FOOT, not the shoe length - some extra 1 cm IS ALREADY ADDED BY SAGUARO to the respective shoe sizes.)
