The size chart indicates the inner length and width OF THE SHOE in centimetres.

Measure your feet length as described down **AND THEN add an extra 0.5-1.2 cm to the length of your foot, and you will get the ideal size of your shoe.**

(PETRI'S TIP - Belenka's 0,5 cm is way too little especially for kid's growing feet! **Add 1-1,5 cm for the same season and up to 2 cm if the shoes are expected to be used the next season as well.** Choose the bigger model if you are in between two sizes!)

How to measure your foot correctly?

- 1) Place a blank A4-sized paper on a flat, smooth and even surface.
- 2) Step onto the paper with all your weight on the leg.
- 3) Use a pen/pencil to mark the heel and the farthest point from the heel (beware, it may not always be the big toe)
- 4) Measure the distance between these two points on feet with a ruler (the difference can be ± 0.5 cm)
- 5) The number obtained is the length of your foot
- 6) **Add an extra 0.5-1.2 cm to the length of your foot, and you will get the ideal size of your shoe.**
