## SIZE CHART - VIVO TRACKER WINTER III SG - WOMENS

1) Check the length of your feet according to the instructions below.

*2)* Add 10-20 mm to the measurement of your LONGER foot to ensure you get the right amount of room. *(See PETRI'S NOTE down!)*

3) From that number (the length of your longer foot plus 10-20 mm), choose the right shoe size according to the diagram below.

| | | | | | | |
|---|---|---|---|---|---|---|
| Inner length of the shoe | 24 cm | 24,6 cm | 25 cm | 26 cm | 26,5 cm | 27 cm |
| EU | 36 | 37 | 38 | 39 | 40 | 41 |

## How to measure your feet?

Step 1

Position a piece of paper on a hard floor next to the wall and step on it, making sure that your heel is slightly touching the wall behind.

Step 2

Mark the end of your big toe and the outermost part of your heel on the paper and repeat the process with your other foot.

Step 3

Measure the distance between the two markings for both feet, add 10-20 mm to ensure they have the right amount of space, and convert on the chart above. If your feet have two different sizes, when comparing against the size chart use the length of your larger foot.

***

***(PETRI'S NOTE!** Vivo shoes are about 5 mm longer than many of our other models in the same EU size. There is one important, specific feature to the Vivo last: while the toe box is wide, the outer edge of the shoe curves quite sharply inward near the little toe.*

*We recommend an allowance (extra space) of 10–15 mm for those whose toe line closely follows the curve of the front of the Vivo shoe and/or who have a moderate foot volume; for those with a straighter toe line and/or greater foot volume, we*

*recommend an allowance of 15–20 mm. Women with wide feet should opt for men's sizes whenever possible.*

*You might find that two different sizes finally work for you—the leather can stretch significantly in width if needed, though it won't stretch if the shoe already has a larger volume relative to your foot. As a general guide, the leather can stretch at least as much as the extra space you gain by removing the insole when trying on a new pair.)*
